Transcript: Persona 2 — Victor / Contributing / Altrocentric

Profile: Senior product manager, shipped a feature sprint that was two weeks behind, stayed back to help a junior teammate debug a blocker.

[START]

> Good evening. You made it through another day. This reflection won't take long — just a few honest questions about how you showed up. No right answers. Just noticing.

→ *Employee clicks: Begin*

[A1_OPEN] — Axis 1 begins

> Before we dig in — if today had a weather report, what would it be?

→ **"Sunny: clear, things flowed"**

Signal: none | Routes to: A1_Q1_HIGH

[A1_Q1_HIGH]

> You had a relatively clear day. When something went well, what do you think made it happen?

→ **"I adapted when the original plan didn't work"**

Signal: axis1:internal | Routes to: A1_D1 → A1_Q2_INTERNAL

[A1_Q2_INTERNAL]

> Think about one moment today where something didn't go as planned. What was your actual first thought?

→ **"'What can I do right now?'"**

Signal: axis1:internal | Routes to: A1_D2 → A1_R_INTERNAL

[A1_R_INTERNAL] — Reflection

> You spotted the edge of your control and moved toward it — not away. That's not something everyone does automatically. Some days that instinct is louder than others. Notice it was there today.

→ *Employee clicks: Continue*

Signal: axis1:internal | Routes to: BRIDGE_1_2

[BRIDGE_1_2]

> You've looked at how you navigated today. Now let's look at what you gave.

(auto-advances after 1.8s)

[A2_OPEN] — Axis 2 begins

> Today, which of these moments happened? Pick the one that feels most true.

→ **"I helped someone with something outside my job description"**

Signal: none | Routes to: A2_D0 → A2_Q1_CONTRIBUTION

[A2_Q1_CONTRIBUTION]

> When you helped or gave extra today — what was the honest reason behind it?

→ **"I did it because it needed doing and I was there"**

Signal: axis2:contribution | Routes to: A2_D1 → A2_Q2_CONTRIBUTION

[A2_Q2_CONTRIBUTION]

> Thinking about your work today overall — how would you describe your posture toward it?

→ **"I was thinking about impact: who does this serve?"**

Signal: axis2:contribution | Routes to: A2_D2 → A2_R_CONTRIBUTION

[A2_R_CONTRIBUTION] — Reflection

> You spent energy today giving — to a person, to an outcome, to something beyond checking boxes. That's not nothing. It's what separates work that feels meaningful from work that just gets done. Notice that instinct in yourself.

→ *Employee clicks: Continue*

Signal: axis2:contribution | Routes to: BRIDGE_2_3

[BRIDGE_2_3]

> You've looked at what you navigated and what you gave. One more lens: how wide was your view today?

(auto-advances)

[A3_OPEN] — Axis 3 begins

> When you think about today's biggest challenge or moment, who was in the frame?

→ **"My team — we were in it together"**

Signal: none | Routes to: A3_D0 → A3_Q1_ALTO

[A3_Q1_ALTO]

> Your frame was wider today — team or beyond. Did that perspective change how you approached the work?

→ **"Yes — I made different choices because of it"**

Signal: axis3:altrocentric | Routes to: A3_D1C → A3_Q2_ALTO

[A3_Q2_ALTO]

> You held a wider view today. Thinking about tomorrow — what's one small thing you could do that would make someone else's day marginally easier?

→ **"Share something I learned today that might help someone else"**

Signal: axis3:altrocentric | Routes to: A3_D2C → A3_R_ALTO

[A3_R_ALTO] — Reflection

> You carried something beyond yourself today — a team, a user, a mission. That's not common. Maslow called this self-transcendence: the orientation that generates meaning even when personal outcomes are uncertain. You touched that today.

→ *Employee clicks: Continue*

Signal: axis3:altrocentric | Routes to: SUMMARY

[SUMMARY]

Axis	Signal Tally	Dominant
Axis 1 (Locus)	internal: 3, external: 0	**internal**
Axis 2 (Orientation)	contribution: 2, entitlement: 0	**contribution**
Axis 3 (Radius)	altrocentric: 2, mid: 0, self: 0	**altrocentric**

Summary template key: `internal_contribution_altrocentric`

> **That's a strong day. You stayed in the driver's seat, gave freely, and kept others in view. Not every day looks like this — remember it.**
> *You said today felt like "Sunny: clear, things flowed."*

[END]

> See you tomorrow.

Path trace (non-decision nodes visited):

START → A1_OPEN → A1_Q1_HIGH → A1_Q2_INTERNAL → A1_R_INTERNAL → BRIDGE_1_2 → A2_OPEN → A2_Q1_CONTRIBUTION → A2_Q2_CONTRIBUTION → A2_R_CONTRIBUTION → BRIDGE_2_3 → A3_OPEN → A3_Q1_ALTO → A3_Q2_ALTO → A3_R_ALTO → SUMMARY → END

Total: 17 nodes | 6 questions answered | ~5 minutes

Comparison with Persona 1

Dimension	Persona 1	Persona 2
Opening question	Stormy	Sunny
A1 routing	Q1_LOW → Q2_EXTERNAL	Q1_HIGH → Q2_INTERNAL
A1 reflection	"Where was your choice?"	"Notice that instinct"
A2 routing	ENTITLEMENT path	CONTRIBUTION path
A2 reflection	Fairness + ledger	Meaning beyond boxes
A3 routing	SELF path	ALTO path
A3 reflection	"Extend compassion inward"	"Self-transcendence"

Dimension	Persona 1	Persona 2
Summary key	external_entitlement_self	internal_contribution_altrocentric
Summary tone	Gentle validation of a hard day	Recognition of an unusual day

Both employees completed the **same 6 questions** and visited the **same number of nodes (17)**. The branching produced **entirely different reflection text** at each axis — all from a lookup table, no generation.
